

# Classifying Polygons

Objective; I can describe a polygon

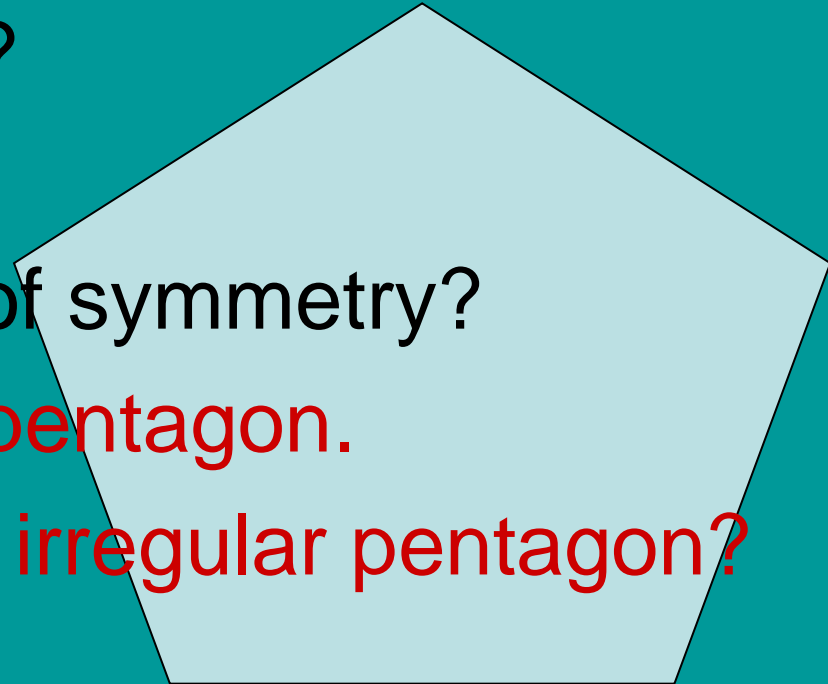

# How can we describe this shape?

- Are there any right angles?
- How many sides?
- Is it regular?
- How many lines of symmetry?
- What would you call this shape?

# How can we describe this shape?

- Are there any right angles?
- How many sides?
- Is it regular?
- How many lines of symmetry?
- This is a regular pentagon.
- Can you draw an irregular pentagon?

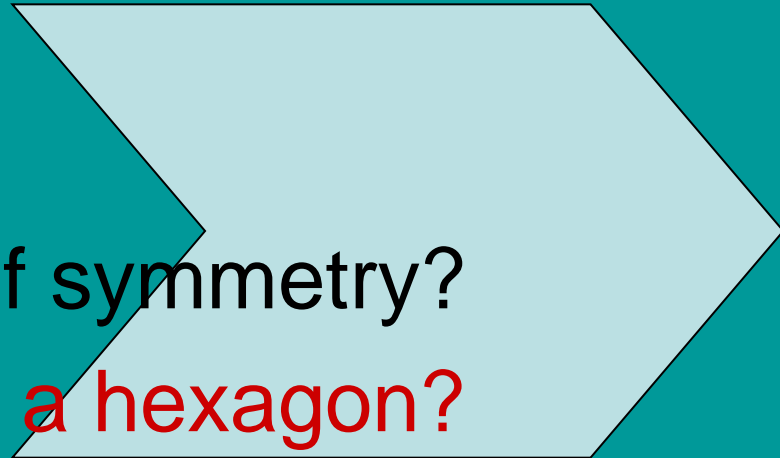

# How can we describe this shape?

- Are there any right angles?
- How many sides?
- Is it regular?
- How many lines of symmetry?
- This is an irregular hexagon because.....
- Can you draw a different hexagon?

# How can we describe this shape?

- Are there any right angles?
- How many sides?
- Is it regular?
- How many lines of symmetry?
- Why is this shape a hexagon?
- Can you draw a hexagon with right angles?

# How can we describe this shape?

- Are there any right angles?
- How many sides?
- Is it regular?
- How many lines of symmetry?
- **What would you call this shape?**
