

Fractions - How many?

Example:

How many $\frac{1}{4}$ s are in 1 and $\frac{1}{2}$?

Answer = 6

(There are 6 $\frac{1}{4}$ s in 1 and $\frac{1}{2}$)

1. How many $\frac{1}{4}$ s in 1 and $\frac{1}{4}$?

2. How many $\frac{1}{4}$ s in 1 and $\frac{3}{4}$?

3. How many $\frac{1}{4}$ s in 2 and $\frac{1}{4}$?

4. How many $\frac{1}{8}$ s in $\frac{6}{8}$?

5. How many $\frac{1}{3}$ s in 1 and $\frac{1}{3}$?

For the next 4 questions, you will have to shade the shapes with the correct amount before finding the amounts:

6. How many $\frac{1}{4}$ s in 2 and $\frac{3}{4}$?

7. How many $\frac{1}{8}$ s in 1 and $\frac{3}{8}$?

8. How many $\frac{1}{6}$ s in 1 and $\frac{2}{6}$?

9. How many $\frac{1}{2}$ s in 1 and $\frac{1}{2}$?

Fractions - How many?

Extension

1. How many $\frac{1}{4}$ s in $2\frac{1}{4}$?

2. How many $\frac{1}{3}$ s in $2\frac{2}{3}$?

3. How many $\frac{1}{4}$ s in $4\frac{3}{4}$?

1. How many $\frac{1}{8}$ s in $3\frac{1}{8}$?
