How many of the following Maths problems can you solve? Can you find the multiplication pattern/rule?

$$
\begin{array}{ll}
20 \times 4 & 10 \times 13 \\
30 \times 3 & 40 \times 2 \\
50 \times 6 & 70 \times 3
\end{array}
$$

What is the pattern/rule?

## Can you find TWO ways to make the number...

## 99

From the following numbers:

You can add numbers, take them away, multiply and divide - whatever way you find easiest!

There may be more than one solution - can you find more than one?

You can only use each number once!!! (unless the number appears more than once)

## Can you find TWO ways to make the number...

$$
42
$$

From the following numbers:

You can add numbers, take them away, multiply and divide - whatever way you find easiest!

There may be more than one solution - can you find more than one?

You can only use each number once!!! (unless the number appears more than once)

## Can you find TWO ways to make the number...

## 52

From the following numbers:

You can add numbers, take them away, multiply and divide - whatever way you find easiest!

There may be more than one solution - can you find more than one?

You can only use each number once!!! (unless the number appears more than once)

## Double the following numbers

$$
\begin{array}{ccc}
7 & 8 & 9 \\
17 & 18 & 19 \\
27 & 28 & 29 \\
37 & 38 & 39
\end{array}
$$

Is there a pattern? Write down what the pattern is.

## Can you find TWO ways to make the number...

## 209

From the following numbers:
50
3

You can add numbers, take them away, multiply and divide - whatever way you find easiest!

There may be more than one solution - can you find more than one?

You can only use each number once!!! (unless the number appears more than once)

Multiply all the following numbers by 3 :
8
5
10
4
9
0
11
20
12
15
13
14
30
50

Multiply all the following numbers by 4 :
8 5
10 4
9
0
11
20
12
15
13
14
30
50

Multiply all the following numbers by 5:
8
5
10
4
9
0
11
20
12
15
13
14
30

## Can you find TWO ways to make the number...

$$
31
$$

From the following numbers:

| 5 | 7 | 4 |
| :--- | :--- | :--- |
| 3 | 1 | 6 |

You can add numbers, take them away, multiply and divide - whatever way you find easiest!

There may be more than one solution - can you find more than one?

Can you think of TWO ways to make the number...

From the following numbers:

You can add numbers, take them away, multiply and divide - whatever way you find easiest!

There may be more than one solution - can you find more than one?

## Can you find TWO ways to make the number...

## 22

From the following numbers:

You can add numbers, take them away, multiply and divide - whatever way you find easiest!

There may be more than one solution - can you find more than one?

You can only use each number once!!! (unless the number appears more than once)

## Can you find TWO ways to make the number...

## 29

From the following numbers:

You can add numbers, take them away, multiply and divide - whatever way you find easiest!

There may be more than one solution - can you find more than one?

How many different sums can you create to make the number...

23

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

50

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

20

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 52

You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

32
You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 150

You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 500

You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

71

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

98
You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

56

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 1200

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 468

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 460

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

350
You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 380

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 800

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 840

You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 99

You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 201

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 480

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 256

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## You must have:

At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

88
You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

How many different sums can you create to make the number...

## 162

You must have:
At least 5 sums that contain the + sign At least 5 sums that contain the - sign At least 2 sums that contain the $x$ sign At least 1 sign that contains the $\div$ sign

Can you write the following numbers in WORDS.

## Examples:

807 would be written as eight hundred and seven.
1234 would be written as one thousand two hundred and thirty four.
713 would be written as seven hundred and thirteen.

| 639 | 503 |
| :--- | :--- |
| 401 | 1285 |
| 400 | 700 |
| 2185 | 951 |
| 1030 | 1003 |

Can you write the following numbers in WORDS.

## Examples:

807 would be written as eight hundred and seven.
1234 would be written as one thousand two hundred and thirty four.
713 would be written as seven hundred and thirteen.

| 1139 | 673 |
| :--- | :--- |
| 99 | 1500 |
| 678 | 2085 |
| 2850 | 3000 |
| 4500 | 1007 |

Can you write the following numbers in WORDS.

## Examples:

807 would be written as eight hundred and seven.
1234 would be written as one thousand two hundred and thirty four.
713 would be written as seven hundred and thirteen.

| 1500 | 1673 |
| :--- | :--- |
| 2099 | 500 |
| 668 | 2007 |
| 2070 | 3001 |
| 5000 | 1257 |

Can you write the following numbers in WORDS.

## Examples:

807 would be written as eight hundred and seven.
1234 would be written as one thousand two hundred and thirty four.
713 would be written as seven hundred and thirteen.

| 1945 | 1456 |
| :--- | :--- |
| 2060 | 2600 |
| 2006 | 104 |
| 1005 | 301 |
| 8000 | 67 |

Can you write the following numbers in WORDS.

## Examples:

807 would be written as eight hundred and seven.
1234 would be written as one thousand two hundred and thirty four.
713 would be written as seven hundred and thirteen.
